Sidegrain Furniture, Floor & Stair Plugs

Sidegrain Plugs are cut so that the long grain is showing. They are usually used to hide screw holes by matching the grain direction and colour of the surrounding wood in furniture and flooring. Interesting decorative effects can also be achieved using contrasting wood species.

Hardwood Dowels

Our birch dowels have a constant diameter - unlike many imported dowels that are 'just a bit' larger or smaller than you expect. A selection of Bear Woods kiln dried, clear, smooth dowels in your shop will often come in handy. Due to special packaging requirements we request that you order at least \$10 worth of dowels per order.

Scroll Saw Blades

Double Tooth Blades are a popular blade due to the excellent blend of the tooth/skip pattern. Double tooth blades contain sets of closely pitched teeth that aid in producing a fine finish and the skip adds the benefit of effective chip removal. Thickness of work range 1/16" to 2-1/2". Double tooth blades perform well with wood, plastic, bone, Corian and most fibrous materials.

Reverse & Double Tooth Reverse Skip Blades have the same basic tooth geometry as skip blades except that a limited number of reverse teeth have been added to the bottom of the blade. Reverse teeth prevent splinters from developing on the underside of the work piece because the top teeth do not cut entirely through the work. Thickness of work range 1/4" to 2". Blades perform well with wood, plastic, bone, Corian and most fibrous materials.

Modified Geometry Blades tooth design, minimizes burning, tolerates aggressive feed rates, expels chips extremely fast, leaves a smooth finish and cuts patterns accurately. This blade can be used on soft and hard wood up to 3" thick. It is also well suited for plastic. If you are currently using Olson PGT or Mach blades you will love our Modified Geometry blades and save big bucks.

Spiral Blades provide cutting around the entire periphery of the blade due to a helical shape. This design allows work to be fed in straight moves. The work does not have to be turned to make cuts, so sharp inside corners can be created. Excellent for wood, plastic, ferrous metals, nonferrous metals, bone, wax and more.

Regular Blades 5" & 6" Designed as a utility blade for a broad range of applications these blades are compatible for use in C-arm and parallel power scroll saws. Good for hard and soft wood up to 3/4" thick. Finish is medium to smooth depending on tpi selected.

Pégas saw blades are manufactured in Switzerland from high quality carbon steel and contain the highest possible carbon content for saw blade applications. Pégas also makes use of a proven fabricating process that produces crisp, sharp, precisely formed teeth. All the blades are heat treated and tempered to maintain uniform grain structure and to achieve the highest hardness possible. This process creates long lasting durable blades, making them the finest in the world. Additionally, all Pégas blades are capable of performing in power saw applications.

Skip Tooth Blades are a good all around versatile application blade. The range of sizes and teeth per inch allows the cutting of intricate patterns as well as rough-cut work. Thickness of work range from 1/16" to 2-1/2". Skip blades perform well with wood, plastic, bone, Corian and most fibrous materials. The blades provide good chip removal, will accept a fast feed rate, and will give a smooth finish.

Scrollsaw Files

Scrollsaw files are inexpensive accessories that convert most scroll saws into power sanders. Scrollsaw files shape and sand complex contours and forms easily eliminating the need for tedious hand sanding. The silicon carbide abrasive is aggressive enough to cut as well as sand in most materials. Each package contains two 5" plain end files.

Electric Lamp Kits & Music Movements

Turn treasured pieces and collectibles into unique lighting accents quickly and easily. Most kits come with a brass, push-through, side-exit fixture that uses up to a standard 60 watt bulb (not included) and 6' brown cord with a polarized, molded plug, so there's no need to drill. Components are CSA approved.

1

Canning Jar Lamp Kit

Brass plated, fully assembled. Lid fits 2-3/4" opening. 6' brown cord.

4

Birdhouse Lamp Kit

Instantly turns birdhouses into lamps. Just screw into roof of wooden birdhouses. Kit has brass finish socket, 1" spacer and 6' brown cord. Pre-assembled socket.

Flower Pot Lamp Kit

Transforms ordinary clay pots into novel light accents. Kit contains 2" brass finish socket, spacer, 1-1/4" check ring, mounting hardware and 6' brown cord. Pre-assembled socket.

8

Nostalgia Lamp Kit

Fits 9"-11" container. Includes brass finish socket, 14" straight fixture pipe, 8" harp, rubber feet, mounting hardware and 6' brown cord. Cord exits through bottom of pipe. Unassembled.

2

Basket Lamp Kit

Clamps easily onto basket handle without damage to the basket. Solid brass clamp fits handle up to 3/8" thick. Socket is pre-assembled. Clamp parts furnished loose. 6' brown cord.

3

Bottle Stopper Lamp Kit

Cork measures 7/8" top, 5/8" bottom and 1" high. Brass plate cap is 1" in dia. Only socket is pre-assembled. 6' brown cord.

Bottle Lamp Kit

Works with most any bottle or jug. Comes with 3 rubber adapters, (1/2", 3/4", 15/16" x 3/4"H) and necessary hardware. Pre-assembled socket. 6' brown cord.

18 Note Handwind Musical Movements

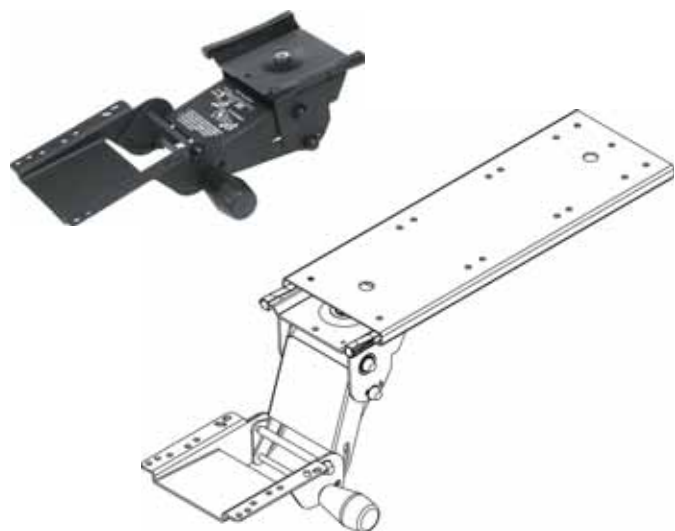

Add the joy of music to your next project. Each movement includes a key and has a removable shell and base. Your choice of 36 songs to suit your musical project. Anything from dolls to musical plates. Check our website for trip levers and turntables to make animated toys with our movements.

Our ERG-340 ABS plastic keyboard support tray comes with sliding and forward indexing mouse surface for either left or right hand use, anti-skid pads and gel-like foam wrist rest. The ERG-345 has all the same quality features without a built-in mouse platform.

- Anti-skid pads prevent keyboard slippage
- Left or right hand use of mousing surface
- Built-in cable management
- Removable snap-in 19" gel-like foam wrist rest
- Fits most wave style keyboards
- Universal mounting pattern attaches to all our keyboard arms

Ergonomic Quick Mount Keyboard Tray

- Stable, durable design
- Height and tilt adjustable gel wrist rest
- Clamps firmly to keyboard with soft rubber bumpers
- Mouse tray with swivel and tilt capabilities
- Spring-loaded adjustment to fit most keyboards
- Designed to work with our ERG-113 computer arm
- Meets or exceeds ANSI/BIFMA standards

- Heavy use typing
- SOHO (Small Office Home Office)
- Health care institutions
- Commercial and industrial users

Our 200 Series articulating keyboard arm incorporates new dial knob technology for easy tilt adjustment from -15 degrees to +10 degrees, allowing for optimum comfort to a variety of users. The 200 Series arm also uses patented features such as Lift-N-Lock™ technology for effortless height adjustment and choice of glide or ball bearing low profile track ensuring the easiest, most comfortable and convenient arm for use in the office environment. In addition a new tilt indicator has been added to compliment the ease of use. The 200 Series is available in a short, extended and sit/stand configurations to fit your application. Made in Canada.

CPU Holders (Locking & Non-Locking)

Lock & Store™

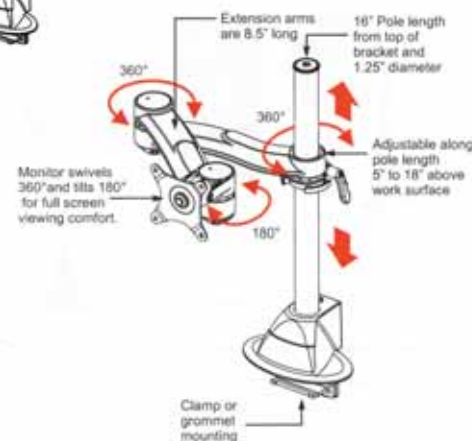

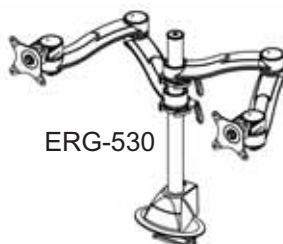

Lock and store cumbersome CPU towers safely below nearly any work surface eliminating the risks associated with leaving it on the floor. Lock & Store is a vertically mounted CPU holder with low profile glide or ball bearing track options to match your budget and needs. All models (except fixed mount) rotate 360° for easy access to rear panel connections. To deter theft, Lock & Store also features an adjustable base rail. A larger base provides additional support for the CPU. Made in Canada.

Features:

- Key lock knob prevents removal
- Vertical CPU support mounts below most work surfaces
- Adjustable steel base rail on non-fixed models
- Knob secures CPU with a unique, easy access built-in lock mechanism
- 360° swivel is provided for quick access to rear connections on non-fixed models.

Mini Quartz Clock Movements

- 10 Year Warranty
- Dimensions: 2-1/8"W x 2-1/8"H x 5/8"D
- American "I" Shaft - Diameter 5/16"
- Front Loading Hanger
- Accurate Within 2 Minutes A Year
- Fits 3" Diameter Hole

- Step Second Hand
- Runs on 1 "AA" Size Battery
- **Free** Set Of Hands and Mounting Hardware With Each Clock Movement
- Made in USA

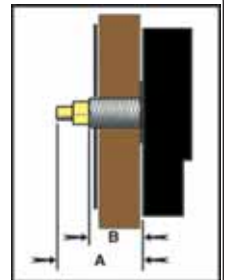

1. Drill a 3/8" hole through the material you are working with and insert the movement.
2. Slide brass washer over shaft.
3. Attach dial mounting hex nut.
4. Gently press hour hand onto shaft at 12:00 position.
5. Place minute hand over shaft at 12:00 position.
6. Gently screw minute nut in place.
7. Press on second hand at 12:00 position.
8. Screw on cap nut if no second hand is used.

Q-16	3/4" thick	15/16"	1-1/4"					
Q-COV	Movement Cover							

Selecting the Proper Shaft Length

Proper shaft length is important to ensure sufficient clearance when going through your dial board and when using a glass front on your clock. Overall Length (A) is measured from the tip of the hand shaft to the movement cast. Allow an extra 1/8" for a cap nut or a sweep second hand. The threaded length of the shaft (B) secures your movement to the dial board or wood. Measure the thickness of the material through which the shaft must pass, add the dial or face thickness and allow about 1/8" for mounting hardware to get the proper shaft length for your clock project.

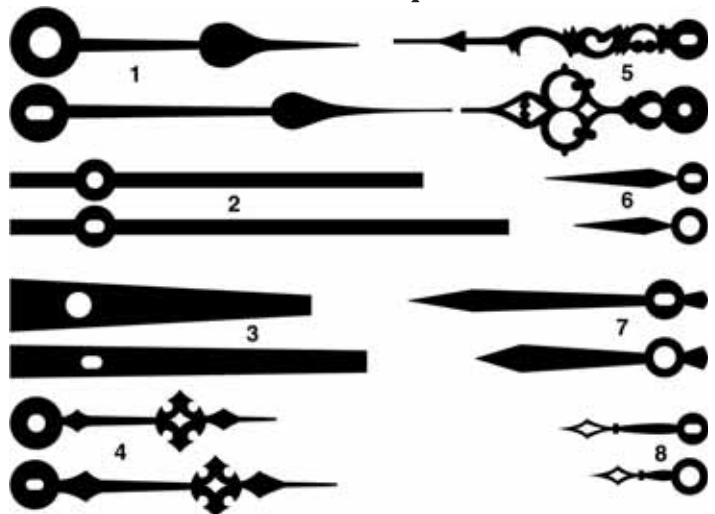

Clock Hands

Please choose one set of **FREE** black or brass hands with each quartz clock movement ordered. Size is determined by the measurement of the minute hand from the center of the mounting hole to the tip, up to 1/4" can be trimmed if necessary. Black hands can be spray painted any colour. Each set of hands include a red sweep second hand.

CLOCK HANDS (Free with each movement)

8	2-3/4"	QH-801	QH-802

Clock hands are available separately at \$1.25 per set

Mini Movement Cover

Our cover provides a neater, more professional look to clocks with exposed movements. It completely covers the back of the movement including the battery.

Tip: When choosing hands to match your clock dial, divide the dial diameter by 2 to get an approx. maximum size for your minute hand.

Quartz Pendulum & Chime Clock Movements

1. Mini Size Quartz Pendulum Movement

Ideal for compact cases, it has a step second hand, runs on a single "AA" battery and comes with a 10 year warranty. It is 2-1/8" wide x 3-3/8" high x 7/8" deep. **Free** set of hands, mounting hardware and adjustable Brass Pendulum Bob (3 sizes to choose from) included with each movement.

2. Standard Size Quartz Pendulum Movement

High quality movement comes with a 10 year warranty. It has a front loading hanger, a step second hand and runs on a single "C" cell battery. This movement is 3" wide x 3-1/2" high x 1" deep. **Free** set of hands, mounting hardware and adjustable Brass Pendulum Bob (3 sizes to choose from) included with each movement.

3 & 4. Traditional Westminster Chime

Full-sized quartz movement plays the traditional Westminster Chimes melody of a grandfather clock every quarter hour, as well as counting out the hours on the hour. A great choice for wall, desk and mantle clocks. Style (3) is 3" wide x 4-5/8" high x 1-1/4" deep. Style (4) is 3"W x 3-3/4"H. It has a front loading hanger, a step second hand and runs on a single "C" cell battery. **Free** hands and mounting hardware included. Adjustable Brass Pendulum Bob included with style (3) pendulum movement. 1 year warranty.

5. Quartz 6 Melody Chime

Choose from Ave Maria, Over the Rainbow. Try to Remember, Happy Birthday, Westminster Chime and Rudolph the Red Nosed Reindeer by turning the selection knob on the back of the movement. Every hour the chosen melody will play. Movement is 3" wide x 3-3/4" high x 1-1/4" deep. It has a front loading hanger, a step second hand and runs on a single "C" cell battery. **Free** hands and mounting hardware included. 1 year warranty.
