Amazing! 11/19/2019

By Lori Corbett

When I first heard of this type of saw, I was skeptical, but very curious. I'm so happy "curious" won. This amazing saw is able to make extremely intricate cuts, even on thick wood. Because of the small blade size, it is imperative that you let the saw do the work, and don't try to force it. The dual speed is a good option to have available, too. I cut on high speed, and trust me the cuts are clean (none of those bandsaw ripples), and didn't burn the wood like the smaller tabletop saws tend to do.

Fantastic 12/15/2022

By John Henson

Okay, I must admit that I have been using another brand (an excellent saw) for close to 35 years and didn't think anything could come close to the quality of that saw. I was WRONG!!!! A very good friend talked me into getting the 30" Pegas. Best advice that I could have gotten. My new Pegas is beyond belief. Right out of the box it cuts true, no vibration and so easy to change blades.

Best purchase I have made in 40 years.

By Marvin Huddleston

These blade holders have renewed my
Scrollsaw and it operates better than new!
These have ended slipping blades and the
frequent broken blades on my Excalibur 21!
I am a completely happy camper!

Very Happy Customer 01/21/2023

By Mike Horne

Once again, I have ordered scroll saw blades
from Bear Woods and again they have
delivered. These blades are in a sample pack
and have the straight blades. The quality is
top of the line. They also came earlier than
expected. Thanks to Bear Woods for being
there for me.

Totally great! Happy customer! 02/16/2024

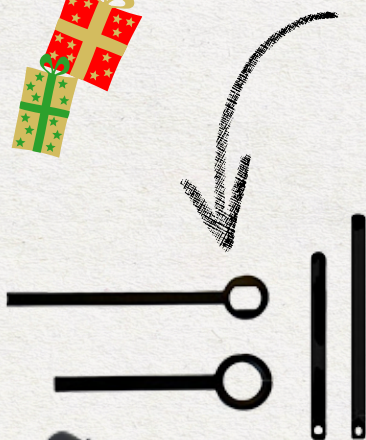

By JS

Had an old clock face that needed new hands & mechanism. This kit installed quickly & easily in no-time (pun intended) with a perfect fit. Its quartz mechanism has been running very accurately for the two months I've had it. Excellent design of only one commonly available AA battery needed for power.

Do not hesitate to do business with this company – they are great!

Happy with the plans 02/18/2021

By Lowell Spee

I was very impressed by how detailed the plans were for the combine. At first it looked like a daunting task, but by taking it one step at a time it took no time and it was complete. I made the first one out of pine as a prototype now I plan to build the next 6 out of black walnut with oak as accent wood for my Grandchildren.

The plans came in a timely manner, they are easy to follow, I am currently building the Fokker VII for my grandson I have been making him things I've built instead of buying him junk from the stores. Better quality and more sentimental. I'm very happy with your products and I would highly recommend them.
